Rugged *EyeBall* Camera for Versatile Surveillance

IRES Technology's new high resolution Varifocal VandalProof *EyeBall* Camera is built to take abuse while providing versatile surveillance. The IP67 rated color camera utilizes a heavy-duty aluminum housing to shield from impact and harsh climatic conditions.

A varifocal lens enables flexible viewing angles. Fine-tuning of the Focus and Zoom is quick and easy using accessible external adjustments. Additionally, 14 Ultra-Bright 8mm LED's enable the camera to view up to 60 ft in low-light conditions with the picture changing to B/W for optimal clarity.

The IRC35319 utilizes a hi-res Sony 520 TV Line CCD and the camera is also available in several other CCD configurations. The ball-joint base allows for versatile mounting options and easy installation on a wall or ceiling. Connection is made simple with BNC termination.
